In the present book we study the pullback equation for differential forms \$\(g\) = f\$, namely, given two differential](#)

k -forms f and g we want to discuss the equivalence of such forms. This turns out to be a system of nonlinear first-order partial differential equations in the unknown map ϕ . The problem that we study here is a particular case of the equivalence of tensors which has received considerable attention. However, the pullback equation for differential forms has quite different
